# Please read this manual first!

Dear Customer,

We hope that your product which has been manufactured in modern facilities and passed through a strict quality control procedure will give you the best results.

Therefore, we advise you to read through this manual carefully before using your product and keep it for future reference.

## This user manual will...

... help you use your machine in a fast and safe way.

- Please read the User Manual before installing and starting your machine.
- Particularly follow the instructions related to safety.
- Keep this User Manual within easy reach. You may need it in the future.
- Please read all additional documents supplied with this machine.

Please note that this User Manual may be applicable for several other models. Differences between models will be identified in the manual.

This product has been produced in environmentally friendly, modern facilities

## FEATURES OF 2008 DVD PLAYER

- ◆ Full discs playback compatibility: DVD,DVD±R,DVD±RW, DVCD, MP3, CD-DA, HDCD , Picture CD.
- ◆ Excellent AV effect:
  - 1.Composite video, S-Video and component video output. Built-in progressive output enables a higher resolution of the pictures.
  - 2.Supports PAL or NTSC system with aspect ratio of 4:3 or 16:9. Fiber optical and coaxial audio outputs are also available.
- ◆ Totally supports multi view-angle, multi-language, multi-subtitle and multi screen mode for DVD discs.
- ◆ Supports parental lock control that prevents children to watch unsuitable scenes.
- ◆ Friendly-interfaced WINDOWS setup menu.
- ◆ Displays the JPEG picture files.
- ◆ MP3 three-dimensional (3D)dynamic playback interface.
- ◆ Possesses agile zoom function, and pictures can be zoomed during playback.
- ◆ NTSC/PAL/AUTO compatible, no compression of pictures.
- ◆ Dynamic screen saver function.
- ◆ Supports setup of video quality.
- ◆ Software update automatically.

## Preparations for the Remote Control

Insert the batteries into the remote control, and you can use it to operate DVD player.

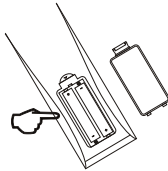

1

Open the cover

2

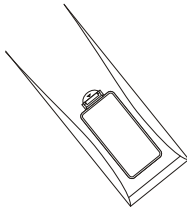

Insert batteries

Make sure to match the + and - to the mark inside the battery compartment.

3

Close the cover.

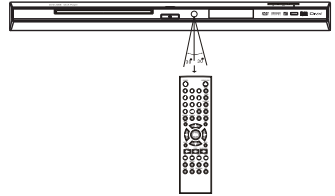

## Notes on the Remote Control

- \* Direct the remote control at the remote sensor of the DVD player.
- \* Do not drop or give the remote control a shock.
- \* Do not leave the remote control near an extremely hot or humid place.
- \* Do not spill water or put anything wet on the remote control.
- \* Do not open the remote control.

## Operating with the Remote Control

This section shows you how to use the remote control.

Point the remote control at the remote sensor and press the buttons.

Distance: Within 6m from the front of the remote sensor

Angle: About 30° in each direction of the remote sensor.

- \* Do not expose the remote sensor of the DVD player to a strong light source such as direct sunlight or illumination. If you do so, you may not be able to operate the DVD player with the remote control.

## Notes on Batteries

Improper use of batteries may cause battery leakage and corrosion. To operate the remote control correctly, follow the instructions below.

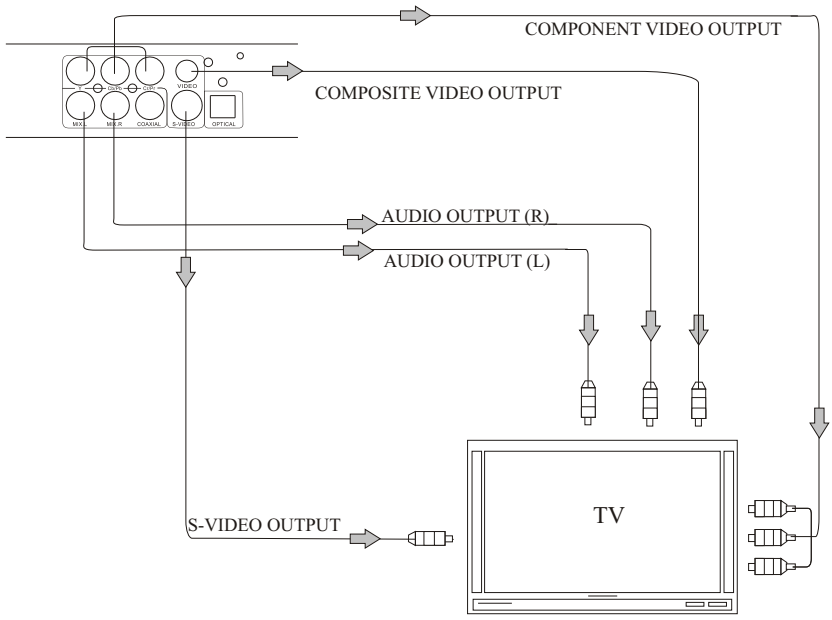

- \* Do not insert the batteries into the remote control in the wrong direction.
- \* Do not leave the discarded or exhausted batteries in the remote control.
- \* Do not use different types of batteries together, or mix old and new batteries.
- \* If you do not use the remote control for a long period of time, remove the batteries to avoid possible damage from battery corrosion.
- \* If the remote control does not function correctly or if the operating range becomes reduced, replace all batteries with new ones.
- \* If battery leakage occurs, wipe the battery liquid from the battery compartment, then insert new batteries.
- \* The battery can last for about 1 year when normally used.

## Connecting to a TV

## Connect the DVD player to a TV.

### Connecting to an Interlaced Scanning TV

100100100100  
00100100100  
0100100100

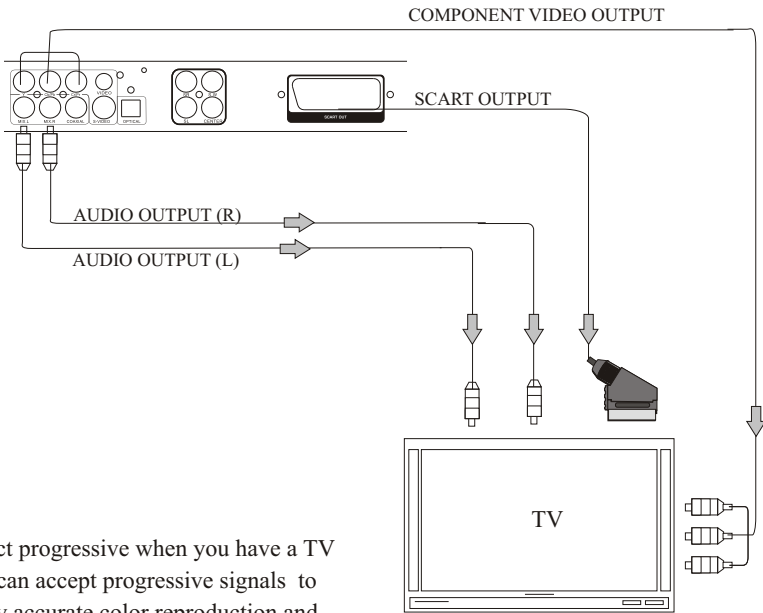

### Notes:

- (1) If the TV has component video input (YcbCr/YPbPr) jacks, you can connect them to the YcbCr/YPbPr jacks of the DVD player to get a clearer picture, and use these jacks rather than the S-VIDEO OUTPUT jack.
- (2) DVD player setup: (Setup the DVD player according to the connected TV.)
  - ★ If the TV system is PAL, select PAL output.
  - ★ If the TV system is NTSC, select NTSC output.
  - ★ Connect the DVD player to the wide screen TV, set the “TV TYPE” as “16:9 ” in FUNCTION SETUP.
  - ★ If the DVD player is connected to an ordinary TV, set the “TV TYPE” to “4: 3 PS” or “4: 3 LB” in FUNCTION SETUP.

## Connecting to a TV      Connect the DVD player to a TV.

### Connecting to a Progressive Scanning TV

0100100100  
0100100100  
00100100

#### Notes:

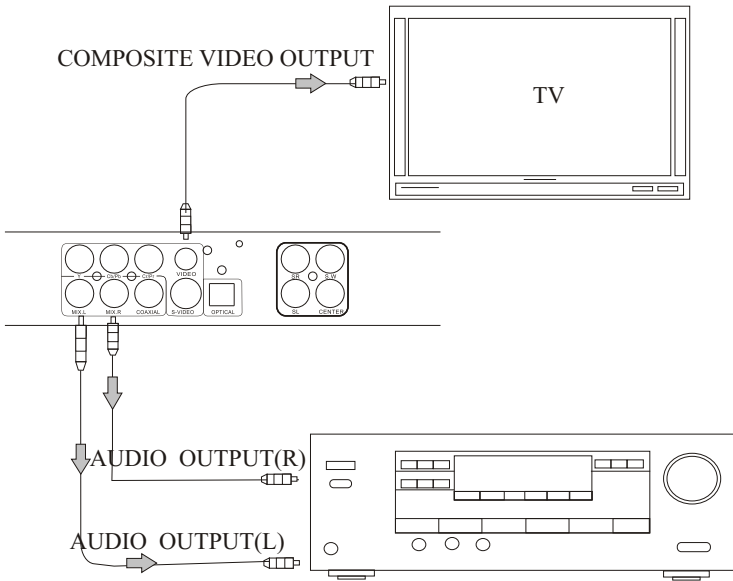

1. Select progressive when you have a TV that can accept progressive signals to enjoy accurate color reproduction and high quality images.
2. If your TV has a component video (YPbPr) input connector, connect the YPbPr video out jacks on the DVD player to corresponding input on the TV.
3. If your TV has a SCART input connector, connect the SCART out jacks on the DVD player to the corresponding input on the TV.

## Connecting to an Audio System

You can enjoy the sound of discs in stereo.

## Connecting to the Amplifier System

0100100100  
0100100100  
00100100

### Notes:

Refer to the user's manual of the connected equipment as well.

When you connect the DVD player to other equipment, be sure to turn off the power and unplug all the equipment from the wall outlet before making any connections.

If you place the DVD player near a tuner or radio, the radio broadcast sound might be distorted. In this case, place the DVD player away from the tuner or radio.

The output sound of the DVD player has a wide dynamic range. Be sure to adjust the receiver's volume to a moderate listening level. Otherwise, a sudden high volume may damage the speakers.

Turn off the audio system before you connect or disconnect the DVD player's power cord. Otherwise, the speaker may be damaged.

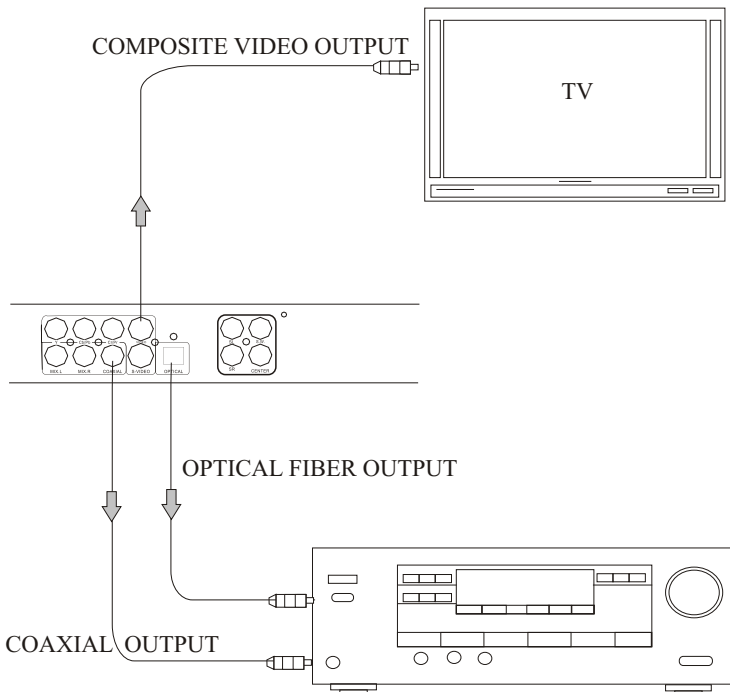

## Connecting to an Audio System

### Connecting to the Amplifier with Digital Input Port

00100100100  
0100100100  
100100100

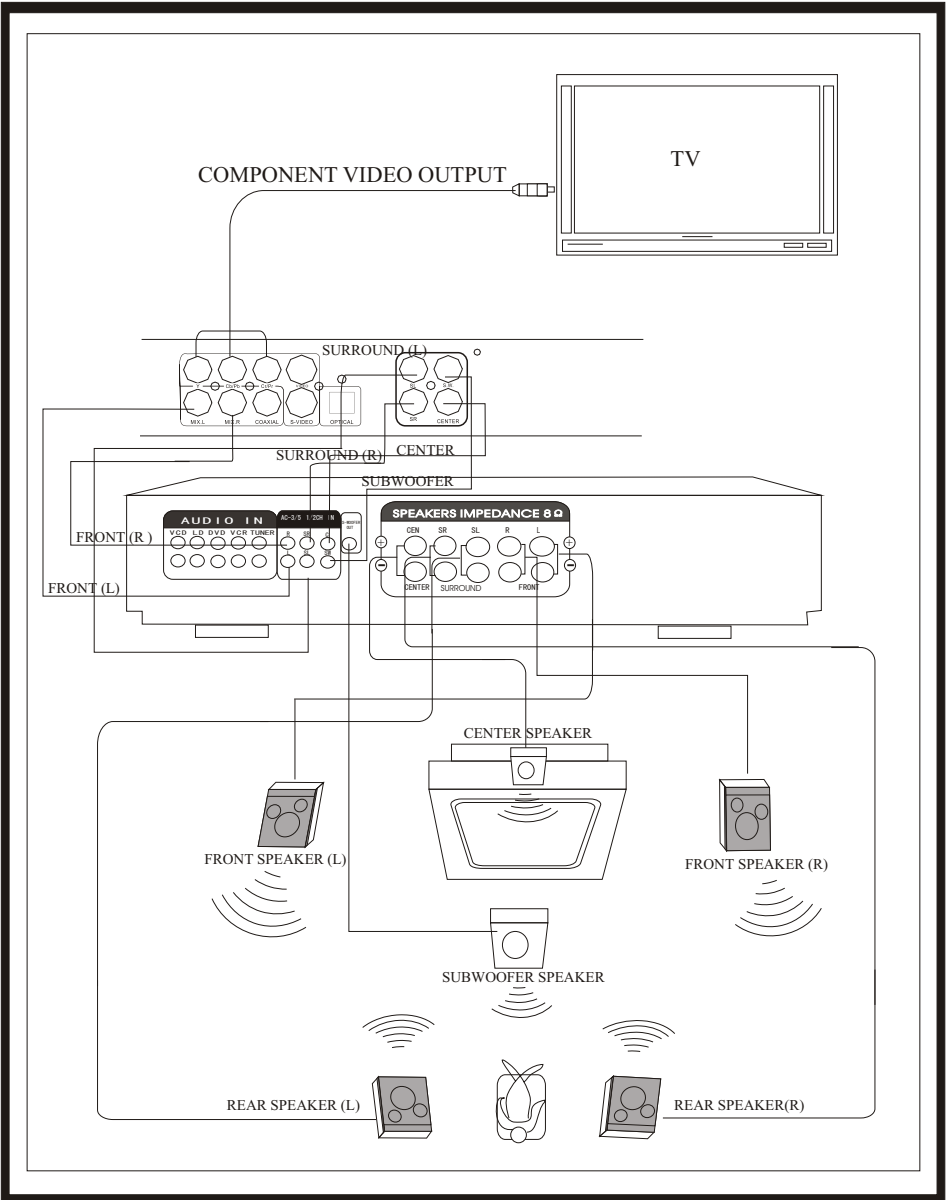

#### Dolby Digital

Dolby Digital is the surround sound technology used in theatres showing the latest movies, and is now available to reproduce this realistic effect at home. You can enjoy motion picture and live concert DVD video discs with this dynamic realistic sound by connecting the DVD player to a 5.1-channel amplifier with a Dolby Digital decoder or Dolby Surround decoder, you will obtain the full benefit from the DVD movies that provide full 5.1-channel Dolby Digital sound tracks, as well as from those with the Dolby Surround mark.

# Connecting to the Amplifier with 5.1-channel Surround Input

00100100100  
0100100100  
100100100

## Basic Playback

00100100100  
0100100100  
100100100

### Preparations

- If you want to play a DVD, VCD or CD-DA disc, turn on the TV and select the video input source which is connected to the DVD player.
- If you want to enjoy the sound of disc from the audio system, turn on the audio system and select the input source which is connected to the DVD player.
- For connection details, see 'Connections' .

<p>1. Turn on the DVD player Press the POWER button on the front panel, And then press the PLAY button to wakeup the DVD.</p>	<p>When the Player is not used for a long period, please pull off the power plug.</p>
<p>2. Open the tray Press the OPEN/CLOSE button to open the disc tray.</p>	
<p>3. Place the disc When the disc tray is open, place the disc on the disc tray, with the playback side down..</p>	<p>Notes: There are two different disc sizes. Place the disc in the correct guide on the disc tray. If the disc is out of the guide, it may damage the disc and cause the DVD player to malfunction. Do not place anything except the DVD, VCD, CD and MP3 discs on the disc tray.</p>
<p>4. Play Press the PLAY button, the disc tray closes and playback starts. When playing a DVD disc with the title menu recorded or VIDEO CD with the playback control (PBC), a menu screen will appear.</p>	<p>Notes: For the playback control (PBC) of the VCD2.0 and SVCD, please refer to PBC Playback. When not using the menu screen (with PBC) of the VCD2.0 or SVCD, you can press the PBC button to turn off the "PBC" .</p>

### Notes

- Do not move the DVD player during playback. Doing so may damage the disc.
- Use the OPEN/CLOSE button on the remote control or DVD player to open or close the disc tray. Do not push or touch the disc tray while moving. Doing so may cause the DVD player to malfunction.
- Do not push up on the disc tray or put any objects other than discs on the disc tray. Doing so may cause the DVD player to malfunction.

## ● Enjoy pictures of higher quality

Sometimes when playing DVD discs, on the TV screen there is unusual interference that are not common in ordinary television broadcast. This is because the high-resolution pictures of DVD discs contain a wide range of information. The extent of the interference depends on the TV set connected with the DVD player, and it is recommended that you set the TV set to a low contrast ratio when watch a DVD disc.

## Playback Control

0000000000  
010000100  
100100100

### 1.Direction Buttons

Press the direction buttons to move the cursor to the selected item, then press the ENTER button to confirm it.

#### 2.Play

Press this button to play the disc.

#### 3. Pause/Step

Press this button once to pause the playback. and press this button twice to step the playback

#### 4.Clear

Press this button to clear the input digits (displays on the screen) when programming tracks or in searching operation.

#### 5.Number Buttons

When playing a VCD disc, press the number buttons directly to play your favorite track in PBC off status. If the track number is from 1 to 9, you can directly press the number. If the track number is more than 9, you should use button 10+ and the other number buttons together to select the track, eg.: for track 25, first, press the +10 button twice, then press button 5.

#### 6.STOP

When playing a DVD disc, press this button the first time during playback, the DVD player memorizes the location where you stopped (press PLAY to resume playback from the memorized point). Press this button again to stop the disc (then press PLAY to start playing from the beginning of the disc).

#### 7.FF / FB

You may speed up a DVD , CD, VCD or Mp3 disc by pressing the FF / FB buttons on the Remote control . You can fast reverse at 2X,4X,8X and 20X.

#### 8.SLOW

Press PLAY button to resume normal playback.

#### 9.NEXT /P REV

Press skip to select the next (previous) chapter (for DVD) or track (for VCD/CD/MP3).

#### 10.ZOOM

This feature allows you to enlarge the picture on screen 2X , 3X, 4X,1/2X,1/3X, and 1/4X the original size . Press the ZOOM button to cyclically scroll through the available strengths

### 11.A-B

You can replay a specific portion of a disc repeatedly using this function

Press the A-B button on the Remote control to select the starting point for the section to be repeated.

Press the A-B button on the Remote control again to select the ending point This section will now continue to repeat until; A-B is pressed for a third time to resume normal playback

### 12. REPEAT

This function can be used to repeatedly play a Title Chapter , Track or other part of a disc.

DVD-Press REPEAT on the Remote Control to cyclically select CHAPTER REPEAT-TITLE REPEAT -REPEAT ALL-REPEAT OFF .

CD/VCD - When PBC is off , Press REPEAT on the Remote Control to cyclically select REPEAT ONE-REPEAT ALL-REPEAT OFF.

### 13. PROGRAM

You can program the player to play a customised order of specific tracks , title or chapters . To program a DVD follow the instructions below.

- 1) Press the PROGRAM button to initiate the program function
- 2) Press LEFT or RIGHT to highlight either T for title or C for CHAPTER
- 3) Press the Numeric button of the desired title and chapter
- 4) Highlight PLAY on the screen using the direction button and press ENTER. Your programmed list will now be set
- 5) Press the PLAY button after programming to begin playback of the memorised play-list . The memory is erased if the disc tray is opened . The unit is powered OFF or the STOP button is pressed twice. For CD programming follow the above steps 1-5. For steps 2-3, enter the track number instead of the title and chapter numbers

## Playback Control

00100100100  
0100100100  
100100100

### 14. SEARCH

Press this button to search the playback point by chapter number or title time (for DVD discs), disc time or track time or track number (for SVCD/VCD/CD discs)

### 15.N/P

Press this button to swith the TV type ,NTSC-PAL-AUTO

### 19. OPEN/CLOSE

Press this button to open or close the disc tray.

### 20. POWER

When this button is pressed, the DVD player will enter standby status. Press this button again to resume the player.

**Note:** When the Player is not used for a long period, please pull off the power plug.

### 21. VIDEO

The user can adjust the output mode of the pictures among INTERLACE-YUV , TV-RGB P-SCAN YPBPR or S-Video output.

This button is a hot button, it has the same function as the VIDEO SETUP item in the SETUP menu. As for details of connection with the TV set, please refer to the CONNECTIONS chapter.

### 22. AUDIO

This button allows the user to select a preferred audio language from those included on the disc.

## Set Hot Button

00100100100  
0100100100  
100100100

### 16. DISPLAY

Press this key to display on TV the time information of current playback. For different discs, different choices are available.

### 17. MENU

For DVD discs, press this button to enter DVD menu (if supported by the discs).

### 18. PBC

For SVCD or VCD2.0 discs, press this button to open/close the PBC functions.

- a. In the PBC display of the SVCD or VCD2.0, if the PLAY button is pressed, the player will enter PBC playback status. If the PBC is turned off, the disc will be played as VCD1.0/1.1.
- b. When PBC is set to ON, menu of the disc appears on the screen, press the number buttons to select and play the track you want.
- c. Press this button to return to the interface of selecting tracks.

## DVD Function

00100100100  
0100100100  
100100100

### 23. TITLE

For DVD discs, press this button to enter the title menu, then press the direction buttons and PLAY button to select and play. (If it is supported by the discs.)

### 24. ANGLE

Press this button to change the camera angle of the scene you are watching if the scene was recorded from multiple angles. (It needs support of the discs.)

### 25. SUBTITLE

For those DVD discs that have multiple languages of caption recorded, press this button to change the caption to different languages.

## Volume Control

### 26. VOLUME

With an analog Audio connection . The volume can be adjusted using the VOL+ and VOL- buttons . The volume can be muted by pressing the MUTE button on the remote control.

### 27. MUTE

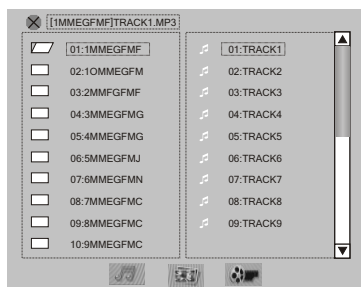

Press this button to set the play mute, press this button again to cancel the mute state.

## Screen Saver Function

In the stop status and when no discs in the player, the player will enter screen saving status automatically 3 minutes later. Press the PLAY button or OPEN/CLOSE button to resume the player.

## Mp3 Playback

When Mp3 disc is being played,the playback menu will appear on the screen,as shown in the following figure.

You can either into the directory that you want to play by using the directional button, and then the first song will be played. The directional button can also be used to choose any file you would like to play in the file area. When the cursor is in left film column, Press number key to select file. When in right one it can select document.

## JPEG Picture Display

The playback menu of the JPG picture is similar to MP3 playback menu. Please refer to MP3 playback.

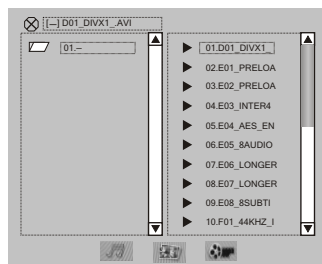

When playing the JPG pictures, press STOP button to enter the picture previewing mode. After entering this mode, operate with the direction buttons and play button. Press PLAY or ENTER button to return to the playback mode.

## Playback Divx® VIDEO

DivX Video is an encoder/decoder, based on the MPEG-4 compression system, which is used to encrypt and display compressed video data. This enables the DVD player to play back videos compressed in the DivX® format. This results in playback quality with less artefacts and higher compression. DivX® video files have the suffix .AVI. DivX® Video data are packed into the AVI file along with audio data which is compressed as MP3 data, this means:

DivX® Video and MP3 audio form the AVI file.

Further information on DivX® Video and how to create AVI files can be found under [www.DivX Networks.de](http://www.DivXNetworks.de).

- 1 After the disc compartment shuts and the DivX® Video CD is scanned, the file browser (the table of contents) of the DivX® Video CD is displayed.
- 2 Select the folder or track required with >>▲<< or >>▼<<.  
– A list of sub-directories appears.

## Playback DivX® VIDEO

00100100100  
0100100100  
100100100

- 3 Open the folder with  $\boxed{\text{F}} \gg \text{OK} \ll$  or  $\gg \blacktriangleright \ll$ .

Note:

Press  $\gg \text{RETURN} \ll$   $\boxed{\text{O}}$  go back one level.

- 4 Press  $\gg \blacktriangleright \ll \boxed{\text{I}}$  start playback of the track.  
– The playing time appears in the display on the DVD player.

Notes:

Information about the DivX® Video track selected can be called up with  $\gg \text{ENTER} \ll$ .

The contents of the DivX® Video CD (file browser) can be called up with  $\gg \text{RETURN} \ll$ .

- 5 Press  $\gg \parallel \ll \boxed{\text{O}}$  interrupt playback (pause).
- 6 Press  $\gg \blacktriangleright \ll \boxed{\text{O}}$  resume playback.
- 7 End playback by pressing  $\gg \blacksquare \ll \boxed{\text{O}}$ .

Selecting specific tracks using the number keys

- 1 During playback select the desired track with  $\gg \text{I} \dots 0 \ll$   
– Playback begins with the selected track.  $\square$

Selecting a track in steps (SKIP)

- 1 Select the next track by pressing  $\gg \blacktriangleright \blacktriangleright \ll$  during playback.
- 2 Select the previous track by pressing  $\gg \blacktriangleleft \blacktriangleleft \ll$ .  
– Playback begins with the selected track.

- 2 Move the freeze frame step by step forwards with  $\gg \parallel \ll$ .
- 3 Press  $\gg \blacktriangleright \ll \boxed{\text{O}}$  resume normal playback.

Enlarging the picture—zoom (DivX® Video CD only) This function allows you to enlarge various picture sections.

## On Handling Discs

- Do not touch the playback side of the disc.

- Do not attach paper or tape to discs.

## On Cleaning discs

- Fingerprints and dust on the disc may cause picture and sound deterioration. Wipe the disc from the center outwards with a soft cloth. Always keep the disc clean.
- If you cannot wipe off the dust with a soft cloth, wipe the disc lightly with a slightly moistened soft cloth and finish with a dry cloth. Do not use any type of solvent such as thinner, benzene, commercially available cleaners or antistatic spray for vinyl LPs. They may damage the disc.

## On Storing Discs

- Do not store discs in a place subject to direct sunlight or near heat sources.
  - Do not store discs in places subject to moisture and dust such as a bathroom or near a humidifier.
- Store discs vertically in a case. Stacking discs or placing objects on the case may warp the discs.

## About this User's Manual

- This user's manual explains the basic instruction of this DVD player. Some DVD video discs are produced in a manner that allows specific or limited operation during playback. As such, the DVD player may not respond to all operating commands. Refer to instruction notes of discs.

## On Discs

	Disc mark	Contents	Disc size	Maximum playback time
DVD video discs		Audio+video (motion picture)	12cm	Approx. 2 hours (single sided single layer disc)
				Approx. 4 hours (single sided double layer disc)
				Approx. 4 hours (double sided single layer disc)
				Approx. 8 hours (double sided double layer disc)
VCD		Audio+video (motion picture)	12cm	Approx. 74 minutes

	The batteries in the remote control are exhausted.	Replace the batteries with new ones.

## Specifications

DVD Player/Outputs/Supplied Accessories

DVD Player

Power Supply	~110V~240V AC,50/60HZ
Power Consumption	≤15W (Normal Playback State)
Mass	2.5Kg±0.25
Size	430x255x38mm(W/H/D)
Signal system	PAL/NTSC
Laser	Semiconductor Laser ( wavelength 650nm,780nm)
Frequency Response	±3db(20HZ-20KHZ)
Signal-to-noise ratio	≥90db
Audio dynamic range	≥80db
Operating conditions	Temperature:-5°C ~40°C, Operation status: Horizontal

Outputs

Composite Video Output	$1.0 \pm 0.2 \text{ V}_{p-p}, 75 \Omega$
Audio Output (analog audio)	$2.0 \begin{matrix} +0.2 \\ -1.0 \end{matrix}$

Supplied Accessories

Scart Cord	-----1
Remote Control	-----1
Batteries	-----2
User's Manual/Maintenance Card	-----1
